

For my presentation I choose Roundabout, Roundabout is a jquery plugin that creates a responsive swipeable carousel.

I choose roundabout because I love photography, and I wanted to do something with my pictures and a responsive swipeable carousel to display them it sounds great!! My family has a sanctuary for animals in danger, all the pictures I used in my presentation were taken by me in the sanctuary called Reavyfeex. I had a lot of fun looking for plugins but this one took my attention so I decided to try and use it and had a lot of fun using it.
