

Reavyfeex

I did my web page about Reavyfeex an animal sanctuary that my family owns all the pictures and video were taken by me.

In all the pages, we have the logo with the company name beside it links with images to the sanctuaries social media links Facebook and Instagram. Below we have the links to each of the site pages the first one being HOME next AROUND THE WORLD and lastly IMAGES.

In the home page, we have a little introduction about Reavyfeex underneath an image carousel displaying some of the animals the captions have animation they show and hide. The line bounces every time you change the picture. After the carousel with the captions, we have an animated bar chart of how many big cats live in Reavyfeex. The animal animations are free vectors by giving credit and embed this link `Icon vector designed by Freepik`.

Next in the Around the world page if you click the button next to the tiger the Interactive map uses an ease out bounce to centre. The interactive map shows the natural habitats of the big cats at Reavyfeex.

And on the last page we have an image gallery using Lightbox and underneath a video.
